PREMIER TENNIS TOUR - RANKING EXPLANATION

Individual ranking points toward the zone semester ranking will be **given for every tournament round**. A player – PTT member can participate in any zone and the ranking points will count toward the home zone of that player.

The best 8 individual point's results will count toward the semester ranking. All the singles and doubles results will count toward an individual ranking. There will be no doubles ranking. To make the ranking easy to understand there will be differentiated by colors: **If a player pushes its individual UTR up, he/she will also move up a color during a season carrying the points accumulated.** The opposite doesn't apply; if a player during a season drops his/her UTR, he/she will not move down a ranking color until the end of the season.

At the beginning of each season every player will start with zero points. Any player is open to play any tournament above his/her individual UTR. **For tournaments with high demand, priority will be given to the players with highest UTR** allowed to participate in that particular tournament, unless a **Wild Card (WC) is given.**
